

SHAIK SHAHUL

AI/ML Developer & Full-Stack Engineer

Chittoor, Andhra Pradesh, India · +91 75697 16576 · codewithshahul@gmail.com

GitHub: <https://github.com/shahul-royalss> · LinkedIn: <https://www.linkedin.com/in/shaik-shahul-b6158b3a1>

SUMMARY

B.Tech Computer Science Engineering (AI & ML) student and freelance full-stack developer. Shipped five client projects end-to-end, including RVS University's official website and a revenue-generating PG-management SaaS. Winner of the state-level APSSDC Hackathon-2026 and 2nd-place finisher at the Masranix Private Technologies hackathon. Currently building PrajaSethu, an AI-powered public grievance platform being prepared for a government pilot in Andhra Pradesh.

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, SQL, Java

Frontend: React.js, Next.js, Tailwind CSS, HTML5, CSS3, Bootstrap, responsive and animated UI, 3D/scroll-based experiences

Backend: Node.js, Express.js, Flask, REST API design, authentication and role-based access control (RBAC), Socket.io/WebSockets, CRUD and file-upload systems

Databases: PostgreSQL, MySQL, SQLite, MongoDB, schema design and data modeling

AI / ML: Machine learning fundamentals, NLP, LLM-based application development, AI classification, recommendation systems, predictive modeling, voice-enabled AI

Product & Architecture: SaaS architecture, multi-role platforms, dashboards and analytics, complaint-management systems

Security: Security fundamentals — web-application vulnerability assessment, Kali Linux, networking, secure data exchange

Cloud & Tools: Vercel, Hostinger, cPanel, domain & DNS configuration, Git, GitHub, VS Code, npm, Postman, Agile, AI-assisted development (Claude Code, MCP)

EXPERIENCE

Developer — PrajaSethu (AI Public Grievance Platform)

2026 – Present

Civic-tech platform for Andhra Pradesh citizens and government departments, in active development

- Developing a platform where citizens raise real-time complaints — including by voice — and departments track and resolve them.
- Working on NLP and LLM features that automatically categorize complaints and flag priority issues.
- Integrating blockchain-based records and a secure inter-department data-exchange layer modeled on Estonia's X-Road.
- Stack: TypeScript, React, Node.js/Express, PostgreSQL — citizen filing flows and department-side tracking interfaces.

Freelance Full-Stack Developer — Self-employed

2025 – Present

5 client projects delivered for NGO and education-sector clients

- Built and launched the official website of RVS University (rvsu.org) — the institution's public portal covering admissions, exam results, and student services.
- Delivered dhrishtaerf.org for Dhrishta Educational & Research Foundation, a Section-8 non-profit running CSR-funded education and job-placement programs for rural women.
- Shipped institutional websites for R.V.S Degree College (rvsdegreecollege.org) and Sri Venkateswara Institute of Medical Lab Technology (svimlt.org).
- Co-built a PG-management SaaS product that is generating revenue.
- Handled the four websites end-to-end — UI, development, deployment, and domain/DNS configuration on Hostinger and cPanel.

ACHIEVEMENTS

- **Winner (1st place), Hackathon-2026 — Naipunyam / APSSDC** — state-level hackathon organized by Sri Venkateswara College of Engineering & Technology (now RVS University) with the AP State Skill Development Corporation (APSSDC),

backed by the Chittoor district administration — 26 Mar 2026. Won in a team of 3 with the social-complaint platform prototype that grew into PrajaSethu; achieved in the first year of B.Tech.

- **2nd Place, Masranix Private Technologies Limited Hackathon** — 3 August 2026. Secured 2nd place in the industry rapid-build round by delivering a working Campus Placement Portal within the event's 40-minute window on the organizer-specified stack (Python, Flask, Bootstrap, SQLite): four-role access for Student, Staff, Training & Placement Officer, and Admin, with admin-approved onboarding and a dashboard tracking students placed in the current academic year.

PROJECTS

- **phantomveil** (Python, MIT, open source) — steganography toolkit for embedding and extracting hidden data in text and images. github.com/shahul-royalss/phantomveil
- **xeyresh** (Python, open source) — web-application vulnerability scanner that detects and reports common security flaws. github.com/shahul-royalss/xeyresh
- **WishTheDish FestTrack** (React, Node.js, PostgreSQL) — real-time festival order management with Socket.io live order queues, stall inventory, and sales analytics.

EDUCATION

B.Tech, Computer Science Engineering (AI & ML) — RVS University (formerly SVCET), Chittoor, AP	2025 – 2029 (2nd year)
Intermediate (MPC) — Srivema Junior College, Naidupeta	2023 – 2025
SSC — Z P High School, L A Sagaram, Tirupati	2023
